³ The vehicle's electrical system (including the battery), the wireless service provider's signal and a connected mobile phone must all be available and operating for 911 Assist® to function properly. These systems may become damaged in a crash. The paired mobile phone must be connected to your SYNC® [Ford/Lincoln Digital Experience] system, and the 911 Assist feature enabled, in order for 911 to be dialed. When the feature is ON, 911 Assist uses your paired and connected mobile phone to assist occupants to contact emergency services by dialing 911 if your airbag deploys or, on certain vehicles, if the emergency fuel pump shut-off is activated. Aftermarket on-board diagnostic devices may interfere with various vehicle systems including Vehicle Health Report and 911 Assist. To avoid interference, remove the device or contact the device maker for more information on compatibility.

² Designed to optimize driving dynamics and provide superior performance on wet and dry roads. High performance summer tires wear faster than non-performance tires. Ford does not recommend using summer tires when temperatures drop to approximately 45 deg F (7 deg C) or below or in snow/ice conditions.

³ Drift brake is intended for track use only. It should never be used on public roads. See Owner's Manual for information on use.
